

## Windows: Deleting files

In the event that you experience a connection failure during a test, you will need to manually delete some of the files generated during your test. These instructions cover how to do this after you have exited SEB.

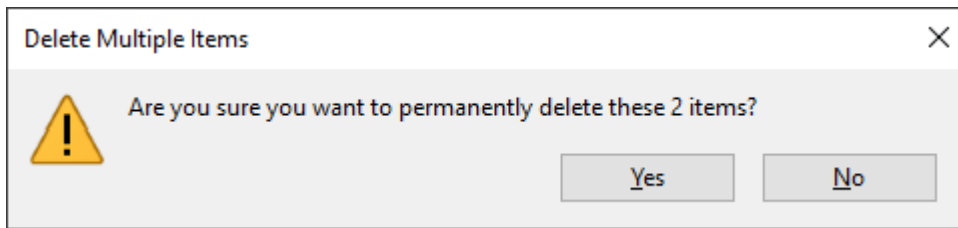

1. Click “Win” + “E”. This will open File explorer the window below:

2. Select “This PC” in the left menu
3. Type “*Inspira SEB kind:folder*” in the search field (top right corner) and press Enter

4. Double click on Inspira SEB folder. You will see an upload folder.
5. Double click to open upload folder and select all files inside.
6. Press “Shift” + “Delete” key. You will get the prompt below, click “Yes”

Alternatively you can also delete all files in upload folder and delete them again in Recycle Bin
